

DESCRIPTION

The CX-OP1500 is an Operation station designed for the CX-1000 series IP communication system. By connecting this station to a network (LAN or WAN), hands-free and handset voice conversations can be made using this station or other intercom stations. You can make broadcasts not only to the same model stations and other intercom stations, but also to the Audio interface and amplifier units. It is equipped with an LCD, a one-touch dialing function, a headset terminal, and an external speaker terminal. Power can be supplied from a PoE-compatible switching hub (in this case, an optional AC adaptor is not required). The CX-OP1500 supports the SIP protocol, which allows conversations with general-purpose SIP phones via the System manager. The supplied Angle adjustment stand allows you to adjust the angle when it is placed on a desk.
